9/10

needs to get out of Early Access

Needs workshop and/or more maps :). Well... this is quite short Visual Novel. Plot seems to be good... and it's completely free. If You are fan of Visual Novels do not hesitate.... Wheel support is severly lacking, creating a 180 degree deadzone when using 900 degrees of rotation. This game is more of a simulator than their earlier games, but not as enjoyable as it's much more difficult to get into.. This game is hard only because of the controls. clicking just to get out of aim down sight is a horrible game mechanic.. Game keeps calling me a son of a ♥♥♥♥♥ 10/10 would play again. WoW! yep, not like the 1st one, type Contra or what ever, cause now it has more of an RPG element so yeah, it's that much better. So far so good =). UniBall is a great game. It has a diverse and unique community which has supported the game throughout its highs and lows, and NickW has shown clarity and determination to ensure this game continuously develops. From this, I believe the transition to Steam will rightfully bring UniBall into the spotlight, and thus giving the game the popularity it deserves.. DONT BUY THE GAME! Menu constantly crashes because it fails to reach nexuiz online servers. Only way to get it working is by disabling the games outbound connections with windows firewall. Then you cant play online or LAN...which is the entire point of this game.

best godzilla knockoff ever. An enjoyable puzzle game with replayability. It will take me a good while to do each puzzle in the timed mode.. A little hard, Devs, take the time limit off. I don't know what to think about this yet, but I do wanna see this succeed.. It's bean a while since I've had a mouthful of fun poured onto me like this.
